Languages: Java, C#, JavaScript, SQL
Web Technologies: HTML5, CSS3, RESTful APIs
Databases: MySQL, Firebase
Tools & Platforms: GitHub, VS Code, Microsoft Visual Studio, SQL Server Management Studio, Android Studio
Concepts: OOP, DSA, Database Management Systems, Computer Organization, AI/ML

Experience

Web Development Intern – ApexPlanet Software Pvt. Ltd.	<i>Mar 2026 – Apr 2026</i>
- Built responsive front-end web pages using HTML, CSS, and JavaScript, supporting desktop, tablet, and mobile layouts. - Utilized modern front-end technologies and interactive UI design principles across project-based web development tasks. - Collaborated with team members to develop and refine web applications within a fast-paced internship environment.	
Artificial Intelligence Intern – Pinnacle Labs	<i>May 2026 – Jun 2026</i>
- Developed 4 AI-based applications: Resume Parser, Translator App, Teachable Machine, and Autocorrect Tool. - Employed machine learning and NLP concepts for resume parsing, text correction, and data-processing tasks. - Implemented AI-driven automation techniques for real-time data processing and application development. - Strengthened problem-solving and application development skills through hands-on AI assignments.	

Projects

MoviezWiki – Movie Discovery & Wishlist Platform GitHub Live Demo <i>PHP, Firebase, HTML5, CSS3, JavaScript</i>	<i>Aug 2025 – Nov 2025</i>
- Built a full-stack movie discovery platform using PHP and Firebase, featuring user authentication and email-based password recovery. - Designed a personalized wishlist system allowing users to add, remove, and manage saved movies. - Integrated the Gemini AI API to generate on-demand, AI-powered movie summaries. - Implemented dynamic movie and TV show search with a dedicated section to browse content by country.	
Weather Application GitHub <i>Kotlin, Android Studio, OpenWeather API, XML, JSON Parsing</i>	<i>Aug 2025 – Sep 2025</i>
- Developed a native Android application in Kotlin with real-time weather data retrieval. - Integrated the OpenWeather API to fetch live weather data based on user-entered city names. - Processed JSON responses to display weather information accurately within the application.	

Certifications

Google Cloud Career Launchpad – Generative AI Leader Track (Google Cloud)	<i>Mar 2026</i>
Java Full Stack Developer Certification – Seeding Minds	<i>Apr 2026</i>
Google UX Design Professional Certificate – Coursera & Google	<i>Sep 2025</i>
Innovation by Design – NPTEL (IIT Madras)	<i>Jan 2025</i>
Foundations of Prompt Engineering – AWS Training & Certification	<i>May 2026</i>
